

QCI presents... **fabric_frame**®

We are pleased to offer the **new** state-the-art fabric_frame® system. A **unique** framing system designed for displaying digitally printed fabric panels. We combine the **brilliant** colors you expect from our in house image production department, with a framing system of incredible **versatility**.

Applications:

- Point of purchase displays
- Exhibit display booths
- Wall or room dividers
- Posters
- Free standing units
- Wall-mounted units
- Cable-suspended units

Unique Features:

- Non reflective
 - excellent for TV, media & conference backdrops
- Easy to assemble and change out graphics
- Available as backlit
- Single or double sided
- Weatherproof
- Washable
- Fabrics may be ironed
- Fire retardant material option
- Wrinkles removed with frame tension
- Economical to ship (lightweight, compact)

The fabric easily stretches across frame and inserts into grooves in the hardware.

Fabric_frames® are extremely **attractive** for both large and small applications. Single piece graphic panels can be **custom made** for specifications up to nearly 10 by 40 feet. Single piece backlit fabric can be just over 8 by 19 feet.
